Gender relations are power relations. Often what it means to be a 'woman' is to be powerless (quiet, obedient, accommodating). A 'real man', by contrast, is powerful (outspoken, in control, able to impose his will), particularly in relation to women. These gender roles tend to perpetuate the power inequalities that they are based on.

Gender and power: six links and one big opportunity

'Gender' is one of the most persistent causes, consequences and manifestations of power relations. Understanding gender can therefore significantly enhance our understanding of power and vice versa. Yet donors have largely neglected 'gender' in their efforts to understand power relations in partner countries.

While power is thus articulated through gender (Scott, 1986, p. 45), gender power relations go beyond the unequal distribution of opportunities, resources or recognition; fundamentally, they speak of the institutionalised and thus taken-for-granted processes that shape the capacity to define the conditions for action.

Additional notes and information. General. General. One of the most persistent patterns in the distribution of power is that of inequalities between women and men. The set of roles, behaviours and attitudes that societies define as appropriate for women and men ('gender') can be the cause, consequence and mechanism of power relations, from the intimate sphere of the household to the highest levels of political decision-making.

Gender and Power and Privilege. Issues of gender and privilege have been a common theme in society for many years. The women's liberation movement in the 1960's and 1970's brought into focus some of the privileges that men enjoyed based on gender and how their use of power affected the lives of women. If we look closely at the social status of women and men, we can see that men continue to have privilege over women in many aspects of life.

Gender determines the degree of one's power. At one end of the spectrum is Sycorax, the disempowered, demonized woman; at the other, Prospero, the ruling patriarch. Yet in early modern England, this logic categorizes women as representations of all that opposed men and evaded patriarchal society.

The Gender of Power presents a critique of feminist theories of power as simply top-down models of the oppression of women. The authors argue that this notion presents women as passive victims and ignores the diversity and complexity of women's experiences. The ideas on power of Bourdieu, Giddens, Lukes and Foucault are also evaluated in terms of their usefulness in explaining relations between men and women, which can often be covert, consensual and intimate.

An updated edition of the Sunday Times Bestseller Britain's best-known classicist Mary Beard, is also a committed and vocal feminist. With wry wit, she revisits the gender agenda and shows how history has treated powerful women. Her examples range from the classical world to the modern day, from Medusa and Athena to Theresa May and Hillary Clinton. Beard explores the cultural underpinnings of misogyny, considering the public voice of women, our cultural assumptions about women's relationship with power, and how powerful women resist being packaged into a male template. A year on since the advent of #metoo, Beard looks at how the discussions have moved on during this time, and how that intersects with issues of rape and consent, and the stories men tell themselves to support their actions. In trademark Beardian style, using examples ancient and modern, Beard argues, 'it's time for change - and now!' From the author of international bestseller SPQR: A History of Ancient Rome.

through the practices of power. The contributors argue that female' and male' are shaped not only at the micro-level of everyday social interaction but also at the macro-level where social institutions control and regulate the practice of gender. *Power/Gender* explores: how theorizing on power is affected when gender is taken into account; post-Foucauldian theory of gender and power; whether it is possible to separate gender and power; the connections between gender and the practice of power in political contexts, and how these connections work in the specific contexts of women's lives; and whether the construction of sex or gender is an expression of power relations.

But then a vital new force takes root and flourishes, causing their lives to converge with devastating effect. Teenage girls now have immense physical power--they can cause agonizing pain and even death. And, with this small twist of nature, the world drastically resets. From award-winning author Naomi Alderman, *THE POWER* is speculative fiction at its most ambitious and provocative, at once taking us on a thrilling journey to an alternate reality, and exposing our own world in bold and surprising ways.

The systems approach to the family is based on the assumptions that there is equality between men and women in the family, and that women and men are treated equally in clinical practice. The contributors to this book challenge these hidden assumptions, discussing the issues from both a conceptual and clinical viewpoint. They argue strongly that questions of gender and power should be central to family therapy training and practice.

How do gender and power relationships affect the expression of family, House and dynastic identities? The present study explores this question using a case study of the House of Orange-Nassau, whose extensive visual, material and archival sources from both male and female members enable the authors to trace their complex attempts to express, gain and maintain power: in texts, material culture, and spaces, as well as rituals, acts and practices. The book adopts several innovative approaches to the history of the Orange-Nassau family, and to familial and dynastic studies generally. Firstly, the authors analyse in detail a vast body of previously unexplored sources, including correspondence, artwork, architectural, horticultural and textual commissions, ceremonies, practices and individual actions that have, surprisingly, received little attention to date individually, and consider these as the collective practices of a key early modern dynastic family. They investigate new avenues about the meanings and practices of family and dynasty in the early modern period, extending current research that focuses on dominant men

to ask how women and subordinate men understood 'family' and 'dynasty', in what respects such notions were shared among members, and how it might have been fractured and fashioned by individual experiences. Adopting a transnational approach to the Nassau family, the authors explore the family's self-presentation across a range of languages, cultures and historiographical traditions, situating their representation of themselves as an influential House within an international context and offering a new vision of power as a gendered concept.

Knowledge-for-development is under-theorised and under-researched within development studies, but as a set of policy objectives it is thriving within development practice. Donors and other agencies are striving to improve the flow of information within and between decision-makers and so-called 'poor and marginalized groups' in order to promote economic and social development, including the empowerment of women. *Gender, Power and Knowledge for Development* questions the assumptions and practice of the knowledge-for-development industry. Using a qualitative, multi-site ethnographical study of a Northern-based gender information service and its 'beneficiaries' in India, the book queries the utility of the knowledge paradigm itself and the underlying assumption that a knowledge deficit exists in the Global South. It questions the value of practices designed to address this presumed deficit that seek to increase information without addressing the specific problems of the knowledge systems being targeted for support. After reviewing the evidence, the book recommends that international organisations, governments and practitioners move away from the belief that information intermediaries can employ progressive correctives to 'tinker at the edges' and thus resolve the shortcomings of on-going attempts to use knowledge alone as a driver of development. *Gender, Power and Knowledge for Development* will be of great interest to researchers, students in development studies, gender studies, and communication studies as well as INGOs, donor agencies and groups engaged in information for development (i4D), ICT for development (ICT4D), Tech4Dev, knowledge mobilization and knowledge-for-development (K4D).
