In this second edition that takes into consideration the perpetually evolving NFL rules, How to Beat the Pro Football Pointspread continues to set bettors on a confidence-building path lined with high-priority realities that for decades have flown under the typical football bettor's radar. Smith emphasizes that pure football knowledge must be absorbed and then applied to the world of point spreads. He teaches his readers to look at the game with the bettor's eye instead of the fan's, and explains his theories about reasonable statistical expectations and ways to challenge the oddsmakers. He also discusses the implications of coaching styles, stadium locations, and even the weather on each bet made throughout the season. Is there really such a thing as a professional gambler? The answer is an unequivocal, "Yes!" This book's authors are but two examples. Many thousands of people around the country make a good living exclusively from gambling. It is not easy, but it can be done. The key is to understand which games are beatable and know how to beat them. David Sklansky and Mason Malmuth have spent many years writing about the finer points of poker, blackjack, and other beatable games. As you will see in the book, those other "games" are horses, sports, progressive slots and video poker, casino tournaments, and special promotions. They don't include craps, roulette, keno, or baccarat for reasons they'll explain. This book, was written for the not quite as experienced aspiring gambler. It shows you everything you need to learn and do if you want to gamble for a living from both the practical and the technical standpoints. The rest is up to you.

This book is how to really beat the casino, and this is the book casinos would like to ban! Do not place another bet on ANYTHING until you read this book! Many people think that casinos are run by gangsters and only the casino ever wins - wrong! Or that casinos are for millionaires only and that the minimum bet is \$10,000 - also wrong! Most casinos are highly regulated, licensed and policed, rely on volume and lots of people win every night of the week. Based upon the author's personal experiences from both sides of the table (as dealer and professional gambler) this book is full of true stories about the colourful characters who go to make up most casinos' clientele and staff. Learn how to dodge the pitfalls of the casino world by using my long-proven Golden Rules on how, when, where and what to play, what to avoid and learn the casino tricks on how they keep you playing until you've lost your winnings back. Luck is like the tide, it flows back and forth, but the professional 'gambler' knows how to take advantage of the tides of luck, playing against dealers who's luck is out whilst avoiding 'hot' dealers on a winning streak. It is also crucial to know the odds; for example, did you know that the odds in the game of blackjack often favour the players, so waiting for the odds to favour you BEFORE you place a bet is a very sensible thing to do! But most blackjack players have been misinformed on how to play properly; many think they are 'playing the dealer's card' and go on to 'bust' themselves before the dealer even takes a card - thus the casino rakes in a massive profit before it has even earned it! The switched-on player should never take a card if they can go bust! And the player should never increase his bets when a shoe becomes favourable - this just broadcasts to the casino you have been waiting for the right moment and that you are counting cards - an easy way to get barred! Surely it is better to wait for the right moment, keep your bets modest, win \$500 and walk away (regularly and long-term), rather than getting barred! Note: it is a very sensible idea to avoid American Roulette (with two zeros and thirty eight pockets) since the odds vary from 5.26% to 7.89% in favour of the house, i.e. worse than twice as bad as single zero, 'European' roulette (1.35%-2.7%). And did you know that you should only play against a dealer who you have seen paying out (and avoid the 'hot'/lucky dealers). And learn from something that most experienced Chinese players do, which is never to place a bet on roulette before the spin - because the dealer might deliberately try to spin to miss you! Advice is also given regarding online gambling and what games and odds you should avoid. But this is not just a dry, how-to-play manual for players! It is an adventure packed with true stories about big losers, big winners, colourful casino punters, greedy casino managers, ridiculous casino stupidity, crooked croupiers and all the 'do's and don'ts' you'll ever need. If you are already playing in casinos but losing overall then for 12.99/\$19.99 I will stop you losing and turn your losses into wins - and please DO NOT buy Book Two until you have won over 600/\$1,000 from the insider info in Book 1! Winning money in a casino is wonderful, but the key to successful play is to be in as favourable position as possible BEFORE you place your first bet and then hammer away at them using the 'casinos money' while the odds favour YOU - and then WALK AWAY and spend the winnings elsewhere!"

A riveting inside look at the lucrative world of professional high-stakes sports betting by a journalist who lived a secret life as a key operative in the world's most successful sports gambling ring. When journalist Michael Konik landed an interview with Rick "Big Daddy" Matthews, the largest bet he'd placed on a sporting event was \$200. Konik, an expert blackjack and poker player, was no stranger to Vegas. But Matthews was in a different league: the man was rumored to be the world's smartest sports bettor, the mastermind behind "the Brain Trust," a shadowy group of gamblers known for their expertise in beating the Vegas line. Konik had heard the word on the street -- that Matthews was a snake, a conniver who would do anything to gain an edge. But he was also brilliant, cunning, and charming. And when he asked Konik if he'd like to "make a little money" during the football season, the writer found himself seduced . . . So began Michael Konik's wild ride as an operative of the elite Brain Trust. In *The Smart Money*, Konik takes readers behind the veil of secrecy shrouding the most successful sports betting operation in America, bypassing the myths and the rumors, going all the way to its innermost sanctum. He reveals how they -- and he -- got rich by beating the Vegas lines and, ultimately, the multimillion-dollar offshore betting circuit. He details the excesses and the betrayals, the horse-trading and the paranoia, that are the perks and perils of a lifestyle in which staking inordinate sums of money on the outcome of a single event -- sometimes as much as \$1 million on a football game -- is a normal part of doing business.

Get into the minds of the greatest gamblers of all time. Read in-depth interviews with eight masters of the games. Learn how they think, how they play, and what made them successful. The interview subjects include: Billy Walters (sports betting), Chip Reese (poker), Doyle Brunson (poker), Mike Svobodny (backgammon), Stan Tomchin (backgammon and sports betting), Cathy Hulbert (blackjack and poker), Alan Woods (blackjack and horse racing), and Tommy Hyland (blackjack).

"John Patrick's *Casino Poker* is a book for anyone who has enjoyed a friendly game at home, yet wishes to test his skill against varied (and hitherto unknown) opponents." "The book is not for the novice or the high-stakes professional. It is meant for the intermediate player, instructing him in the skills required to "know when to hold 'em and when to fold 'em," how to watch for "tells" in other players, and how to keep from offering a tell. The book concentrates on "reading" your opponents' play style as well as on self-discipline and money management."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
