Provides an overall introduction to the welding process, illustrating most of the common equipment and work techniques for both the home and shop welding.

This is the most current textbook in teaching the basic concepts of abstract algebra. The author finds that there are many students who just memorise a theorem without having the ability to apply it to a given problem. Therefore, this is a hands-on manual, where many typical algebraic problems are provided for students to be able to apply the theorems and to actually practice the methods they have learned. Each chapter begins with a statement of a major result in Group and Ring Theory, followed by problems and solutions. Contents: Tools and Major Results of Groups; Problems in Group Theory; Tools and Major Results of Ring Theory; Problems in Ring Theory; Index.

Bacteria in Biology, Biotechnology and Medicine is a broadly based textbook of pure and applied bacteriology. Written in clear language, the up-to-date text gives readers access to new ideas and developments in the current literature. The book is intended primarily for undergraduates and postgraduates in biology, biotechnology, medicine, veterinary science, pharmacology, microbiology, food science, environmental science and agriculture; no prior knowledge of bacteria is assumed. The sixth edition has been extensively updated; much of the text is new, or re-written, and there are many new references. Over 70 genera of bacteria, listed alphabetically, are described in the Appendix. Cross-references and a detailed index, maximise the accessibility of data. Reviews of previous editions: "...a useful survey of the subject for students contemplating specialization." —Nature "Singleton assumes the reader has no prior knowledge of DNA and gene expression, and does an extraordinary job of explaining things from scratch." —Quarterly Review of Biology "...recommended to undergraduates and those seeking clear explanations of basic concepts of bacteriology." —Journal of Medical Microbiology

Decolonizing Global Mental Health is a book that maps a strange irony. The World Health Organization (WHO) and the Movement for Global Mental Health are calling to 'scale up' access to psychological and psychiatric treatments globally, particularly within the global South. Simultaneously, in the global North, psychiatry and its often chemical treatments are coming under increased criticism (from both those who take the medication and those in the position to prescribe it). The book argues that it is imperative to explore what counts as evidence within Global Mental Health, and seeks to de-familiarize current 'Western' conceptions of psychology and psychiatry using postcolonial theory. It leads us to wonder whether we should call for equality in global access to psychiatry, whether everyone should have the right to a psychotropic citizenship and whether mental health can, or should, be global. As such, it is ideal reading for undergraduate and postgraduate students, as well as researchers in the fields of critical psychology and psychiatry, social and health psychology, cultural studies, public health and social work.

If you want to learn Prezi, and specifically design within Prezi, this is the book for you. Perhaps you already know a bit about Prezi but have never used it, or perhaps you have used Prezi before but want to learn how to incorporate your own custom design elements. In either case, this book will get you up and running quickly. It would be helpful to have a bit of familiarity with basic design concepts and the use of Prezi, but prior experience is not essential.

The Covenant in Action was developed to continue the inspirational spirit of the COVENANT WITH BLACK AMERICA and to empower people to take effective action to achieve THE COVENANT goals. The information, tools, and ideas presented in The Covenant in Action will enable and inspire people to become agents of change in their respective communities and to become partners in a larger COVENANT movement. The Covenant in Action is organized into three parts: (1) stories about the projects and actions that everyday people have undertaken over the past year that were inspired by the COVENANT WITH BLACK AMERICA; (2) motivational essays from young Black activists who are on the ground impacting their environments; and (3) a toolkit outlining steps you can take to organize, connect, and act. The toolkit contains not only traditional action strategies, but includes innovative approaches to organizing and community building that will result in stronger, more bonded communities that are reflective of their history and past experiences. The COVENANT WITH BLACK AMERICA was only the first step. The Covenant in Action toolkit will prime and prepare individuals and communities to actually move the COVENANT book into action.

Last year, author Lysa TerKeurst released the book *Made to Crave*, providing the Biblical answer to why people diet, regain the weight they lose, and continue to find themselves stuck in this vicious cycle. *Made to Crave* helped thousands of people finally achieve victory in their weight loss journey. But, according to TerKeurst, "We need more than 19 chapters to stay motivated and on track. That's why I wrote this daily devotional with 60 inspirational entries. There is plenty of new material not in the original book. Rest assured, I also included your favorite nuggets of wisdom from *Made to Crave*." Just like the *Made to Crave* book, this *Made to Crave Devotional* is not a how-to get healthy book. It is the road to finding the lasting 'want to' that extends far beyond the surface issues of weighing less and wanting to wear a smaller clothes size. Says TerKeurst: "There's a spiritual battle going on. It's real. And it's amazing how perfectly the Bible gives us specific ways to find victory with our food struggles. "Even for girls who don't crave carrots."

Species. Freshwater mussels are the most rapidly declining group of animals in North America. This guide represents a first-of-its-kind reference to assist both biologists and naturalists in the identification and study of freshwater mussels. *Freshwater Mussels of Texas* contains 224 pages with 226 black and white photographs, 144 color photographs and 79 line drawings covering all 52 species found in Texas waters. Introductory sections cover basic anatomy, reproduction.

Twenty-three essays by young professional philosophers examine crucial ethical and metaphysical aspects of the Buffyverse (the world of Buffy). Though the show

already attracted much scholarly attention, this is the first book to fully disinter the intellectual issues. Designed by Whedon as a multilevel story with most of its meanings deeply buried in heaps of heavy irony, Buffy the Vampire Slayer has replaced The X-Files as the show that explains to Americans the nature of the powerful forces of evil continually threatening to surge into our world of everyday decency and overwhelm it. In the tradition of the classic horror films Buffy the Vampire Slayer addresses ethical issues that have long fascinated audiences. This book draws out the ethical and metaphysical lessons from a pop-culture phenomenon.
