Speaking is a central yet complex area of language acquisition. The assessment of this crucial skill is equally complex because of its interactive nature. This book takes teachers and language testers through the research on the assessment of speaking as well as through current tests of speaking. The book then guides language testers through the stages of test tasks, rating practices and design.

Cambridge IGCSE is the world's most popular international qualification for 14 to 16 year old. It is recognized by leading universities and employers worldwide, and is an international passport to progression and success. Developed over 25 years ago, it is tried, tested and trusted by schools worldwide. This syllabus is designed for learners who are learning Mandarin Chinese as a foreign language. The aim is to develop an ability to use the language effectively for purposes of practical communication. The course is based on the linked language skills of listening, reading, speaking and writing, and these are built on as learners progress through their studies. Cambridge IGCSE Chinese aims to offer insights into the culture and civilization of countries where Mandarin Chinese is spoken, encouraging positive attitudes

towards language learning and towards speakers of foreign languages.

Developed with the IB to accurately match the 2011 syllabus, this comprehensive text tangibly builds fluency and strengthens assessment potential. Oral activities in every chapter build confident speaking skills, and a dedicated unit on literature stretches learners beyond functional language-learning, ensuring exceptional achievement.

Chemical Modelling: Applications and Theory comprises critical literature reviews of all aspects of molecular modelling. Molecular modelling in this context refers to modelling the structure, properties and reactions of atoms, molecules and

materials. The tenth volume of the series brings Jan Ole Joswig to the editorial team, and a wealth of new reviews spanning several disciplines. For example, materials scientists will benefit from the review on Inverse Molecular Design for Materials and Modelling PAHs will be of interest to environmental scientists. Other reviews have detailed focus on modelling, such as Reaction Kinetics and Accurate Modelling of Electric Properties of Polyatomic molecules from the first principles. Each chapter provides a selective review of recent literature, incorporating sufficient historical perspective for the non-specialist to gain an understanding. With chemical modelling covering such a wide range of subjects, this Specialist Periodical Report serves as the first port of call to any chemist, biochemist, materials scientist or
