This book takes a fresh look at programs for advanced studies for high school students in the United States, with a particular focus on the Advanced Placement and the International Baccalaureate programs, and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.

The most comprehensive and correct syllabus coverage, with unrivalled guidance and support straight from the IB. This course book is completely comprehensive with over 600 pages and a free eBook, and was written with the IB so you can trust in an authoritative syllabus match. Fully addresses the new focus on the GDC.
