The 16mm projectionist performs a valuable service to the Navy training program ashore and afloat. All the skill of the motion picture industry, all the skill of the director and actors have gone into the making of a training film. All these skills will be lost unless the projectionist knows his job. Good projection does not call attention to itself; poor projection is marked by distractions and interruptions. These disturbances can be prevented by you if you know your projector and your job. This manual is not a technical service manual but is intended to provide
