LUCIA IS A RESIDENT of Jakeira, one of the many favelas or shantytowns of Rio de Janeiro, the second largest city in Brazil, the fifth most populous country in the world. Robert Gay, a sociologist from Connecticut College and experienced researcher on Brazil, pieced together this account of her life in a series of interviews conducted between 1999 and 2002.

where cocaine is mainly sold in Rio de Janeiro. There are some six hundred favelas in the city, and most of them are controlled by well-organized and heavily armed drug gangs. The struggle for the massive profits from this drug trade has resulted in what are increasingly violent and deadly confrontations between rival drug gangs and a corrupt and brutal police force, that have transformed parts of the city into a war-zone. Lucia tells the story of one woman who was once intimately involved with drug gang life in Rio throughout the 1990s. Through a series of conversations with the author, Lucia describes conditions of poverty, violence, and injustice

that are simply unimaginable to outsiders. In doing so, she explains why women like her become involved with drugs and gangs, and why this situation is unlikely to change.

In the 1980s a poor farmer's son from Recife, Brazil, joined the Brazilian navy and began selling cocaine. After his arrest in Rio de Janeiro he spent the next eight years in prison, where he joined the Comando Vermelho criminal faction and eventually became one of its leaders. Robert Gay tells this young man's dramatic and captivating story in Bruno. In his shockingly candid interviews with Gay, Bruno provides many insights into the criminal world in which he lived: details of day-to-

Drug Dealer's Life: the inner workings of the Brazilian drug trade; the structure of criminal factions; and the complexities of the relationships and links between the prisons, drug trade, gangs, police, and favelas. And most stunningly, Bruno's story suggests that Brazilian mismanagement of the prison system directly led to the Comando Vermelho and other criminal factions' expansion into Rio's favelas, where their turf wars and battles with police have terrorized the city for over two decades.

Drug Dealer Favela examines how inequality, racism, drug trafficking, police brutality, and gang activities affect the daily lives of the people of Caxambu. Some Brazilians see these communities, known as favelas, as centers of drug trafficking that exist beyond the control of the state and threaten the rest of the city. For other Brazilians, favelas are symbols of economic inequality and racial exclusion. Ben Penglase's ethnography goes beyond these perspectives to look at how the people of Caxambu themselves experience violence. Although the favela is often seen as a war zone, the residents are linked to each other through bonds of kinship and friendship. In addition, residents often take

pride in homes and public spaces that they have built and used over generations. Penglase notes that despite poverty, their lives are not completely defined by illegal violence or deprivation. He argues that urban violence and a larger context of inequality create a social world that is deeply contradictory and ambivalent. The unpredictability and instability of daily experiences result in disagreements and tensions, but the residents also experience their neighborhood as a place of social intimacy. As a result, the social world of the neighborhood is both a place of danger and safety.

While some books present "ideal" ethnographic field methods,

realities of fieldwork in action. With a focus on strategies employed with populations at society's margins, twenty-one contemporary ethnographers examine their cutting-edge work with honesty and introspection, drawing readers into the field to reveal the challenges they have faced. Representing disciplinary approaches from criminology, sociology, anthropology, public health, business, and social work, and designed explicitly for courses on ethnographic and qualitative methods, crime, deviance, drugs, and urban sociology, the authors portray an evolving methodology that adapts to the conditions of the field while tackling emerging controversies

They feed political campaigns, increase the arms trade, and function as long-term fixes to capitalism's woes, cracking open new territories to privatization and foreign direct investment. Combining on-the-ground reporting with extensive research, Dawn Paley moves beyond the usual horror stories, beyond journalistic rubbernecking and hand-wringing, to follow the thread of the Drug War story throughout the entire region of Latin America and all the way back to US boardrooms and political offices. consumption of cocaine throughout the Americas and the illicit economy's entanglement with local communities. Based on in-depth interviews and archival research, these essays examine how government agents, acting both within and outside the law, and criminal actors seek to manage the flow of illicit drugs to both maintain order and earn profits. Whether discussing the moral economy of coca cultivation in Bolivia, criminal organizations and drug traffickers in Mexico, or the routes cocaine takes as it travels into and through Guatemala, the contributors demonstrate how entire ways of life are built around cocaine commodification. They consider how the authority

of state actors is coupled with the self-regulating practices of drug producers, traffickers, and dealers, complicating notions of governance and of the relationships between economic and moral economies. The collection also outlines a more progressive drug policy that acknowledges the important role drugs play in the lives of those at the urban and rural margins.

This special issue of Luso-Brazilian Review includes articles on the Lusophone South Atlantic by historians of Africa and Brazil originally presented in May of 2006 at the Michigan State University and University of Michigan's Atlantic History Workshop "ReCapricorning the Atlantic: Luso-Brazilian and Luso-African Perspectives on the Atlantic World." Workshop participants set out to "ReCapricorn the Atlantic" by assessing how new research on the Lusophone South Atlantic modifies, challenges, or confirms major trends and paradigms in the expanding scholarship on Atlantic History.

In 1986, a group of young Brazilian women started a movement to secure economic rights for rural women and transform women's roles in their homes and communities. Together with activists across the country, they built a new democracy in the wake of a military dictatorship. In *Sustaining Activism*, Jeffrey W. Rubin and Emma Sokoloff-Rubin tell the behind-the-scenes story of this remarkable movement. As a father-daughter team, they describe the challenges of ethnographic research and the way their collaboration gave them a unique window into a fiery struggle for equality. Starting in 2002, Rubin and Sokoloff-Rubin traveled together to southern

In the United States, there are some that argue that ethnicity is an ascribed reality. To the contrary, others claim that individuals are becoming increasingly active in choosing and constructing their ethnic identities. Focusing on second-generation South Asian Americans, Bandana Purkayastha offers fresh insights into the subjective experience of race, ethnicity, and social class in an increasingly diverse America. The young people of Indian, Pakistani, Bangladeshi, and Nepalese origin that are the subjects of the study grew up in mostly white middle class suburbs, and their linguistic skills, education, and occupation profiles are indistinguishable from their white peers. By many

them as members of mainstream American culture. But, as Purkayastha shows, their ethnic experiences are shaped by their racial status as neither “white” nor “wholly Asian,” their continuing ties with family members across the world, and a global consumer industry, which targets them as ethnic consumers.” Drawing on information gathered from forty-eight in-depth interviews and years of research, this book illustrates how ethnic identity is negotiated by this group through choice—the adoption of ethnic labels, the invention of “traditions,” the consumption of ethnic products, and participation in voluntary societies. The pan-

ethnic identities that result demonstrate both a resilient attachment to heritage and a celebration of reinvention. Lucidly written and enriched with vivid personal accounts, *Negotiating Ethnicity* is an important contribution to the literature on ethnicity and racialization in contemporary American culture.
