Collection of philosophical papers

In today's world, we are experiencing greater disconnect from our friends and neighbors and our Creator. At this lowest point in the history of Christianity, we need some authentic answers. We have lost sight of who we are. Helen shares her understanding of the glorious purpose and wonder of our humanity.

From the bestselling author of *Waking Up* and *The End of Faith*, an adaptation of his wildly popular, often controversial podcast "Civilization rests on a series of successful conversations." "Sam Harris Sam Harris" neuroscientist, philosopher, and bestselling author "has been exploring some of the most important questions about the human mind, society, and current events on his podcast, *Making Sense*. With over one million downloads per episode, these discussions have clearly hit a nerve, frequently walking a tightrope where either host or guest—and sometimes both—lose their footing, but always in search of a greater understanding of the world in which we live. For Harris, honest conversation, no matter how difficult or controversial, represents the only path to moral and intellectual progress. This book includes a dozen of the best conversations from *Making Sense*, including talks with Daniel Kahneman, Timothy Snyder, Nick Bostrom, and Glen Loury, on topics that range from the nature of consciousness and free will, to politics and extremism, to living ethically. Together they shine a light on what it means to "make sense" in the modern world.

"An excellent interdisciplinary collage . . . of considerable interest to philosophers, psychologists, computer scientists (of a theoretical stripe), sociologists, and others. . . . Rethinking our relationship to animals is very relevant, I believe, to thinking clearly about our current relationships to current (and future) machines."--Keith Gunderson, University of Minnesota

In today's world, we are experiencing greater disconnect from our friends and neighbors and our Creator. At this lowest point in the history of Christianity, we need some authentic answers. We have lost sight of who we are. Helen shares her understanding of the glorious purpose and wonder of our humanity.

This fully revised and extended edition of James Nickel's classic study explains and defends the conception of human rights found in the Universal Declaration of Human Rights (1948) and subsequent human rights treaties. Combining philosophical, legal, and political approaches, Nickel addresses questions about what human rights are, what their content should be, and whether and how they can be justified.

In this six week video study, Adam Hamilton explores the key points in his new book, *Making Sense of the Bible*. With the help of this Leader Guide, groups learn from Hamilton as his video presentations lead groups through the book, focusing on the most important questions we ask about the Bible, its origins and meaning.
