Under increasing pressure to raise graduation rates and ensure that students leave high school college- and career-ready, many school and district leaders may believe that, when students graduate with college acceptances in hand, their work is done. But as Benjamin L. Castleman and Lindsay C. Page show, summer can be a time of significant attrition among college-intending seniors—especially those from low-income families. Anywhere from 10 to 40 percent of students presumed to be headed to college fail to matriculate at any postsecondary institution in the fall following high school. Summer Melt explores the complex factors that contribute to this trend—the absence of school support, confusion over paperwork, lack of parental guidance, and the teenage tendency to procrastinate. The authors draw on findings from fields such as neuroscience, behavioral economics, and social psychology to contextualize these factors. Drawing on a series of research studies, they show how schools and districts can develop effective, low-cost, scalable responses—including counselor outreach, peer mentoring, and using text messages and social media—to help students stay on track over the summer. Summer Melt offers very practical guidance for schools and districts committed to helping their students make the transition to college.

The application of causal inference methods is growing exponentially in fields that deal with observational data. Written by pioneers in the field, this practical book presents an authoritative yet accessible overview of the methods and applications of causal inference. With a wide range of detailed, worked examples using real epidemiologic data as well as software for replicating the analyses, the text provides a thorough introduction to the basics of the theory for non-time-varying treatments and the generalization to complex longitudinal data.

The guide all MBAs and executive education students need. If you're enrolled in an MBA or executive education program, you've probably encountered a powerful learning tool: the business case. But if you're like many people, you may find interpreting and writing about cases mystifying and time-consuming. In *The Case Study Handbook, Revised Edition*, William Ellet presents a potent new approach for efficiently analyzing, discussing, and writing about cases. Early chapters show how to classify cases according to the analytical task they require (making a decision, performing an evaluation, or diagnosing a problem) and quickly establish a base of knowledge about a case. Strategies and templates, in addition to several sample Harvard Business School cases, help you apply the author's framework. Later in the book, Ellet shows how to write persuasive case-analytical essays based on the process laid out earlier. Examples of effective writing further reinforce the methods. The book also includes a chapter on how to talk about cases more effectively in class. Any current or prospective MBA or executive education student needs this guide.
