Why do we differentiate disasters from natural hazards? Natural hazards, such as floods, earthquakes and volcanoes, do not need to become disasters. For example, if volcanoes erupt in a location where nobody lives, the volcano eruption is just a natural hazard, but not a disaster. But if people living around the volcanoes are affected and even ...

gold, with solutions at the back.

From the elephants of Africa to the penguins of Antarctica, children will delight in this colorful, maze-filled journey around the world. The wild trip is courtesy of Roger Moreau, creator of the popular Dinosaur Escape Mazes (60,000 copies sold) and Wizard Magic Mazes (70,000 copies). Start the safari in Nairobi, where-- if you can find your way climbing up vines, running over rough trails, and crossing rivers -- dozens of creatures will greet you, including an endangered Black Rhino. From there, head to Asia and search for a clear path through the bamboo to reach the pandas. Then, it's on to South and North America, and finally to the Arctic where polar bears play and solvers have to go slip-sliding safely across blocks of ice.

Roger Moreau, the maze master who created such popular collections as Dinosaur Escape Mazes and History Mystery Mazes, is going buggy! Every one of these puzzles features creepy-crawly creatures such as dragonflies, centipedes, and tarantulas. Kids will have to take their pencils and find a way to reach them, avoid them, and take them where they want to go. Clear a path past the scrap wood munched and crunched by termites. Move from flower to flower in order to save the ladybug from a hungry praying mantis. Work up the courage to go up close to the black widow spider while keeping well away from her babies. There are 28 mazes in all, including a bonus one on the cover.
