Os animais estão sempre presentes na vida humana, estejamos ou não conscientes disso. Motivadas pela observação de sua importância no cotidiano e na prática clínica como analistas, as autoras desta obra abordam aqui o rico simbolismo ligado ao asno, ao camelo, ao gato, ao golfinho, ao morcego, à raposa e ao rato. Características biológicas, detalhes sobre o habitat e dados atuais acerca desses animais dividem espaço com lendas, mitos e fatos históricos de diversos lugares do mundo – da Amazônia brasileira à Romênia, passando pelo Japão e por muitas regiões longínquas. Este livro – segundo volume de uma obra produzida ao longo de anos de pesquisa – é mais uma contribuição aos inúmeros esforços desenvolvidos por grupos que lutam pelo respeito e pela preservação de nossos companheiros animais. Nesse sentido, o leitor passa a ser conosco mais um elo dessa corrente em prol da harmonia e da saúde da vida no planeta.

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—*homo sapiens*. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

The delightful tale of a wandering good samaritan dog, by the author of *Shrek!* Dominic has decided it is time for a change. So he packs up his hats and his piccolo, and sets off into the unknown. But no sooner does he feel the air on his snout and the grass beneath his paws, than disaster strikes: he encounters the dreaded Doomsday Gang. But Dominic is not one to

complain - and nor is he one to lose a fight. As legend of his victory over the villains spreads, more and more creatures turn to him for help: a 158-year-old turtle, a heartbroken wild boar, and a family of grateful geese all encounter Dominic's heroism and generosity. But his trials are far from over: the Doomsday Gang is alive and kicking, and how can one young dog face a mob of hooligans alone? William Steig (1907-2003) was an American author and illustrator of award-winning books for children. His books include *Shrek!*, on which the films of the same name are based, *Abel's Island* and *The Real Thief*, both published by Pushkin Children's. He twice received the Newbery Honor, was awarded the Caldecott Medal, and was the US nominee for both of the biennial international Hans Christian Andersen Awards, as a children's book illustrator in 1982 and a writer in 1988.

Japanese tattoo was a secret art form of the early 1970s. The masters of the traditional techniques worked in small studios and tattooing was something for a distinguished few. In 1970s, when renowned street art and hip hop photographer Martha Cooper came to Tokyo, she decided to focus on this secret art and began documenting the life and work of traditional Japanese tattooist Horibun I. *Tokyo Tattoo 1970* is a book about the traditional art of tattooing and a portrait of a master artist.

Sérgio Buarque de Holanda's *Roots of Brazil* is one of the iconic books on Brazilian history, society, and culture. Originally published in 1936, it appears here for the first time in an English language translation with a foreword, "Why Read *Roots of Brazil Today?*" by Pedro Meira Monteiro, one of the world's leading experts on Buarque de Holanda. *Roots of Brazil* focuses on the multiple cultural influences that forged twentieth-century Brazil, especially those of the Portuguese, the Spanish, other European colonists, Native Americans, and Africans. Buarque de Holanda argues that all of these originary influences were transformed into a unique Brazilian culture and society—a "transition zone." The book presents an understanding of why and how European culture flourished in a large, tropical environment that was totally foreign to its traditions, and the manner and consequences of this development. Buarque de Holanda uses Max Weber's typological criteria to establish pairs of "ideal types" as a means of stressing particular characteristics of Brazilians, while also trying to understand and explain the local historical process. Along with other early twentieth-century works such as *The Masters and the Slaves* by Gilberto Freyre and *The Colonial Background of Modern Brazil* by Caio Prado Júnior, *Roots of Brazil* set the parameters of Brazilian historiography for a generation and continues to offer keys to understanding the complex history of Brazil. *Roots of Brazil* has been published in Italian, Spanish, Japanese, Chinese, German, and French. This long-awaited English translation
