There is a significant problem in our schools: too many boys are struggling. The list of things to concern teachers is long. Disappointing academic results, a lack of interest in studying, higher exclusion rates, increasing mental health issues, sexist attitudes, an inability to express emotions... Traditional ideas about masculinity are having a negative impact, not only on males, but females too. In this ground-breaking book, Matt Pinkett and Mark Roberts argue that schools must rethink their efforts to get boys back on track. Boys Don ' t Try? examines the research around key topics such as anxiety and achievement, behaviour and bullying, schoolwork and self-esteem. It encourages the reader to reflect on how they define masculinity and consider what we want for boys in our schools. Offering practical quick wins, as well as long-term strategies to help boys become happier and achieve greater academic success, the book offers ways to avoid problematic behaviour by boys and tips to help teachers address poor behaviour when it happens highlights key areas of pastoral care that need to be recognised by schools exposes how popular approaches to "engaging" boys are actually misguided and damaging details how issues like disadvantage, relationships, violence, peer pressure, and pornography affect boys ' perceptions of masculinity and how teachers can challenge these. With an easy-to-navigate three-part structure for each chapter, setting out the stories, key research, and practical solutions, this is essential reading for all classroom teachers and school leaders who are keen to ensure male students enjoy the same success as girls.

As part of the discovery of cognitive science, teachers are waking up to the powers of dual coding - combining words with visuals in your teaching. But cognitive scientists aren't graphic designers, and so their books don't show teachers how to be competent in producing effective visuals. There is a huge gap between what we know about dual coding and the skills needed to practice it effectively in the classroom. Until now. Dual Coding With Teachers is a breakthrough educational book. No other book has been designed with both cognitive science and graphic principles in mind. Every page contains diagrams, infographics, illustrations and graphic organisers. The book is designed to cater for both the busy teacher in a rush, as well as the research-hungry colleague. Over 35 teachers, teacher developers, psychologists and information designers are profiled, each with a double-page spread, highlighting their dual coding practice. The author, Oliver Caviglioli, is uniquely placed to bridge the gap between education and graphic design. A former special school head teacher, Oliver learned design principles from an early age from his architect and typographer father. Four decades of reading educational research has found its visual expression in this spectacular, image-rich book.

Garden Myths examines over 120 horticultural urban legends. Turning wisdom on its head, Robert Pavlis dives deep into traditional garden advice and debunks the myths and misconceptions that abound. He asks critical questions and uses science-based information to understand plants and their environment. Armed with the truth, Robert then turns this knowledge into easy-to-follow advice. - Is fall the best time to clean the garden? - Do bloom boosters work?- Will citronella plants reduce mosquitoes in the garden?- Do pine needles acidify soil?- Should tomatoes be suckered?- Should trees be staked at planting time? - Can burlap keep your trees warm in winter?- Will a pebble tray increase humidity for houseplants? "Garden Myths is a must-read for anyone who wants to use environmentally sound practices. This fascinating and informative book will help you understand plants better, reduce unnecessary work, convince you to buy fewer products and help you enjoy gardening more."

This essential guide helps teachers refine their approach to fundamental challenges in the classroom. Based on research from cognitive science and formative assessment, it ensures teachers can offer all students the support and challenge they need – and can do so sustainably. Written by an experienced teacher and teacher educator, the book balances evidence-informed principles and practical suggestions. It contains: A detailed exploration of six core problems that all teachers face in planning lessons, assessing learning and responding to students. Effective practical strategies to address each of these problems across a range of subjects. Useful examples of each strategy in practice and accounts from teachers already using these approaches. Checklists to apply each principle successfully and advice tailored to teachers with specific responsibilities. This innovative book is a valuable resource for new and experienced teachers alike who wish to become more responsive teachers. It offers the evidence, practical strategies and supportive advice needed to make sustainable, worthwhile changes.

The national curriculum provides an outline of core knowledge around which teachers can develop exciting and stimulating lessons to promote the development of pupils ' knowledge, understanding and skills as part of the wider school curriculum. The Teachers' Standards underpin professional practice and all teachers need to work towards and within this framework. This two-in-one handbook presents the National Curriculum Programmes of Study for ALL curriculum subjects for Key Stages 1, 2 and 3 PLUS the complete Teachers' Standards, making it a handy reference copy whether you are in training or practice. Also included is an introduction by renowned education theorists Dylan Wiliam focusing on the need for a broad and balanced curriculum in schools. A must-have resource for all teachers and trainee teachers!
