For my March mock exam, I recall doing the Pixl paper with the passage about the volcano. That was slightly harder than my Dec mock, and the department also raised the boundaries to give us an extreme example of what to expect/prepare for. I scraped an A on this one, with 32/50.

The world's foremost expert on the English language takes us on an entertaining and eye-opening tour of the history of our vernacular through the ages. In *The Story of English in 100 Words*, an entertaining history of the world's most ubiquitous language, David Crystal draws on one hundred words that best illustrate the huge variety of sources, influences and events that have helped to shape our vernacular since the first definitively English word—'roe'—was written down on the femur of a roe deer in the fifth century. Featuring ancient words ('loaf'), cutting edge terms that reflect our world ('twittersphere'), indispensable words that shape our tongue ('and', 'what'), fanciful words ('fopdoodle') and even obscene expressions (the "c word"...), David Crystal takes readers on a tour of the winding byways of our language via the rude, the obscure and

the downright surprising.

This is the definitive survey of the English language - in all its forms. Crystal writes accessibly about the structure of the language, the uses of English throughout the world and finally he gives a brief history of English. The book has been fully revised and there is a fascinating new chapter on 'The effect of technology' on the English language. 'Illuminating guided tour of our common treasure by one of its most lucid and sensible professionals' The Times 'A splendid blend of erudition and entertainment' THES

Progressively develop students subject knowledge, conceptual understanding and critical thinking skills with a wealth of targeted activities, guidance and assessment preparation tailored to the 2017 AQA GCSE Sociology specification. - Aid understanding of the main points and core concepts with key content summaries and accessible diagrams - Improve research skills with topical examples and methods in context sections for every topic - Extend learning and enhance responses with extension questions, stimulus material and suggestions for further reading - Prepare students for assessment with skills-building activities and practice questions developed for the new specification

A student-friendly and engaging resource for the 2016 Edexcel GCSE Geography B specification, this brand new course is written to match the demands of the specification. As well as providing thorough and rigorous coverage of the spec, this book is designed to engage students in their learning and to motivate them to progress.

Shrubs of broom grow black and twistedAs if by Devil's fingers And the wind that never ceases, Like a chorus from the dead. Those who lived here it's for certain, would grow dark and tortured too' In Jamaica Inn, at the heart of the bleak Bodmin Moor, young Mary Yellen soon discovers mysterious goings-on in the dead of night. But worse is yet to come as Mary finds herself helplessly ensnared in the deadly activities taking place around her. Evocative, atmospheric and chilling, this new adaptation of Jamaica Inn has all the hallmarks of a great adventure classic - murder, mystery and malevolence. Jamaica Inn was produced at the Salisbury Playhouse in May 2004and was followed by a UK tour.

Combining theory and practice, David A. Sousa helps educators understand what is happening in the brains of students with behavior problems and offers practical, effective intervention strategies compatible with current findings in neuroscience. In easy-to-understand language, the author presents current information on brain

development and function and highlights factors that affect social and emotional decision-making and negative behaviors like impulsivity, defiance, and violence. Comprehensive yet concise, this guide for K-12 teachers and counselors provides methods for teaching self-control and fostering positive relationships with troubled students and provides case studies that match effective strategies with specific behaviors. Educators will find answers to critical questions such as: How does the rate of brain development explain erratic behavior of adolescents? What type of data collection can help teachers manage misbehavior? Can peer influence help curb misbehavior rather than encourage it? Why are boys more likely to misbehave than girls and what can teachers do about it? How do school and classroom climates affect student behavior? This invaluable handbook also features reproducible forms, worksheets, checklists, additional references, and an expanded list of primary research sources to help teachers understand and apply research-based principles for classroom and behavior management.

In the last 25 years, planetary science experienced a revolution, as vast oceans of liquid water have been discovered within the heart of the icy moons of our Solar System. These subsurface oceans lie hidden under thick layers of ice. We call them ocean worlds. Some of these icy moons, such as Ganymede, may hold two to three times more liquid water than all the water present on Earth, while others, such as Enceladus and Europa, are thought by astrobiologists to be our best hope of finding extraterrestrial life. In this book, we will explore and compare a variety of Solar System ocean worlds, meeting in the process 22 of the most intriguing objects, from the giant asteroid Ceres to the enigmatic, distant Sedna. In doing so, we will also encounter the multiple spacecraft that brought back most of what we know of these worlds (Pioneers, Voyagers, Cassini-Huygens, etc.), as well as the latest scientific research on this new topic. We will also entertain the possibility of life on each of these ocean worlds by assessing their habitability, as ultimately, these ocean worlds might hold the key to answering the fundamental questions in life: How did life appear? Where do we come from? Is there life out there?
