Qatar today has

has been forecast at 15% for 2014, while spending on infrastructure is set to reach \$150bn in the run-up to the 2022 FIFA World Cup. Against this backdrop, Qatar looks set to continue offering a wide

distinction between the “skilled” and “unskilled”—is generally defined as a measure of ability and training, but Does Skill Make Us Human? shows instead that skill distinctions are

File Type PDF

Qatar

used to limit
freedom, narrow
political
rights, and even
deny access to
imagination and
desire. Natasha
Iskander takes
readers into
Qatar's booming
construction
industry in the
lead-up to the
2022 World Cup,

File Type PDF

Qatar

and through her
unprecedented
look at the
experiences of
migrant workers,
she reveals that
skill functions
as a marker of
social
difference
powerful enough
to structure all
aspects of
social and

File Type PDF

Qatar

economic life.

Through unique
access to

construction
sites in Doha,

in-depth
research, and
interviews,

Iskander
explores how
migrants are
recruited,
trained, and
used. Despite

File Type PDF

Qatar

their
acquisition of
advanced
technical

skills, workers
are commonly
described as
unskilled and
disparaged as
“unproductive,”
“poor quality,”
or simply
“bodies.” She
demonstrates

File Type PDF

Qatar

that skill
categories
adjudicate
personhood,

creating
hierarchies that
shape working
conditions,
labor
recruitment,
migration
policy, the
design of urban
spaces, and the

File Type PDF

Qatar

reach of global
industries.

Iskander also
discusses how

skill

define industry

responses to

global warming,

with employers

recruiting

migrants from

climate-damaged

wages and
exposing these
workers to
Qatar's extreme

heat. She
considers how
the dehumanizing
politics of
skill might be
undone through
tactical
solidarity and
creative
practices. With

File Type PDF

Qatar

implications for
immigrant rights
and migrant
working
conditions
throughout the
world, Does
Skill Make Us
Human? examines
the factors that
justify and
amplify
inequality.

File Type PDF

Qatar's sizable oil and natural gas reserves have underpinned its rapid economic growth over the past two decades.

Home to the world's largest non-associated gas field, the country is the world's fourth-

File Type PDF

Qatar

largest producer of dry natural gas and the largest producer of liquefied natural gas, with hydrocarbons revenues forming the bulk of national income as a result.

Although the drop in global

File Type PDF

Qatar

energy prices
has impacted
export revenues,
rigorous
economic
diversification
drives in recent
years have paid
dividends, and
in 2015 non-
hydrocarbons
growth reached
7.7%, compared
to a 0.1%

File Type PDF

Construction for hydrocarbons growth during the same period.

The country's financial sector has continued to evolve; Islamic banking in particular has witnessed significant progress.

Meanwhile, as

File Type PDF

Qatar

the country
gears up to host
several
important
sporting events
in the coming
years, most
notably the 2022
FIFA World Cup,
numerous big-
