Radio Production is for professionals and students interested in understanding the radio industry in today's ever-changing world. This book features up-to-date coverage of the purpose and use of radio with detailed coverage of current production techniques in the studio and on location. In addition there is exploration of technological advances, including handheld digital recording devices, the use of digital, analogue and virtual mixing desks and current methods of music storage and playback. Within a global context, the sixth edition also explores American radio by providing an overview of the rules, regulations, and purpose of the Federal Communications Commission. The sixth edition includes. Updated material on new digital recording methods, and the development of outside broadcast techniques, including Smartphone use. The use of social media as news sources, and an expansion of the station's presence. Global government regulation and journalistic codes of practice. Comprehensive advice on interviewing, phone-ins, news, radio drama, music, and scheduling. This edition is further enhanced by a companion website, featuring examples, exercises, and resources: www.focalpress.com/cw/mcleish

This classic book is a must-have for anyone involved in radio production, covering everything from operational techniques and producing different programme formats, to conducting interviews and writing for radio. The fifth edition features new and updated information on: * digital production, such as the computer editing process, digital recording and DAB * the internet and internet-only radio stations * automatic playout systems * ethics * storytelling, showing simple ways of creating different acoustics for drama * station management * scheduling * remote reporting This edition is further enhanced by a supporting CD-Rom, packed with examples, exercises and resources.

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Stefan Zweig (1881-1942) was a poet, novelist, and dramatist, but it was his biographies that expressed his full genius, recreating for his international audience the Elizabethan age, the French Revolution, the great days of voyages and discoveries. In this autobiography he holds the mirror up to his own age, telling the story of a generation that "was loaded down with a burden of fate as was hardly any other in the course of history." Zweig attracted to himself the best minds and loftiest souls of his era: Freud, Yeats, Borgese, Pirandello, Gorky, Ravel, Joyce, Toscanini, Jane Addams, Anatole France, and Romain Rolland are but a few of the friends he writes about.

What is Morphology? is a concise and critical introduction to the central ideas of morphology, which has been revised and expanded to include additional material on morphological productivity and the mental lexicon, experimental and computational methods, and new teaching material. Introduces the fundamental aspects of morphology to students with minimal background in linguistics Includes additional material on morphological productivity and the mental lexicon, and experimental and computational methods Features new and revised exercises as well as suggestions for further reading at the end of each chapter Equips students with the skills to analyze a wide breadth of classic morphological issues through engaging examples Uses cross-linguistic data throughout to illustrate concepts, specifically referencing Kujamaat Joola, a Senegalese language Includes a new answer key, available for instructors online at <http://www.wiley.com/go/aroonff>

This book examines the concepts of open innovation, crowdsourcing and co-creation from a holistic point of view and analyzes them considering their suitability to the tourism industry. Methods, theories and models are discussed and examined regarding their practical applicability in tourism. The book illustrates the theoretical mechanisms and principles of Open Innovation, Crowdsourcing and Co-creation with case studies and best practices examples. In addition to the scientific target group, the book is a useful resource for managers of the entire tourism industry. First, the book presents the theoretical fundamentals and concepts in 11 specific chapters. This basis is then enriched by three parts with case studies, focusing on information, creation and provision respectively. Finally in a concluding part the editors sum up the book and give an outlook on the implications, learnings and future perspectives of open innovation, crowdsourcing and collaborative consumption in the tourism industry.
