For many years, kisses were the only sexual acts to be seen in mainstream American movies. Then, in the 1960s and 1970s, American cinema "grew up" in response to the sexual revolution, and movie audiences came to expect more knowledge about what happened between the sheets. In Screening Sex, the renowned film scholar Linda Williams investigates how sex acts have been represented on screen for more than a century and, just as important, how we have watched and experienced those representations. Whether examining the arch artistry of Last Tango in Paris, the on-screen orgasms of Jane Fonda, or the anal sex of two cowboys in Brokeback Mountain, Williams illuminates the forms of pleasure and vicarious knowledge derived from screening sex. Combining stories of her own coming of age as a moviegoer with film history, cultural history, and readings of significant films, Williams presents a fascinating history of the on-screen kiss, a look at the shift from adolescent kisses to more grown-up displays of sex, and a comparison of the "tasteful" Hollywood sexual interlude with sexuality as represented in sexploitation, Blaxploitation, and avant-garde films. She considers Last Tango in Paris and Deep Throat, two 1972 films unapologetically all about sex; In the Realm of the Senses, the only work of 1970s international cinema that combined hard-core sex with erotic art; and the sexual provocations of the mainstream movies Blue Velvet and Brokeback Mountain. She describes art films since the 1990s, in which the sex is aggressive, loveless, or alienated. Finally, Williams reflects on the experience of screening sex on small screens at home rather than on large screens in public. By understanding screening sex as both revelation and concealment, Williams has written the definitive study of sex at the movies. Linda Williams is Professor

In this powerful and personal reflection, a New York Times bestseller, President Jimmy Carter contemplates how faith has sustained him in happiness and disappointment and considers how we may find it in our own lives. All his life, President Jimmy Carter has been a courageous exemplar of faith. Now he shares the lessons he learned. He writes, "The issue of faith arises in almost every area of human existence, so it is important to understand its multiple meanings. In this book, my primary goal is to explore the broader meaning of faith, its far-reaching effect on our lives, and its relationship to past, present, and future events in America and around the world. The religious aspects of faith are also covered, since this is how the word is most often used, and I have included a description of the ways my faith has guided and sustained me, as well as how it has challenged and driven me to seek a closer and better relationship with people and with God." Quoting eminent Protestant theologians, in Faith President Carter describes his belief in religious freedom, moral politics, and the place of prayer in his daily life. He examines faith's many meanings, he describes how to accept it, live it, how to doubt and find faith again. This is a serious and moving reflection from one of America's most admired and respected citizens.

Cat lovers will laugh out loud at the quirkiness of their feline friends with these insightful and curious poems from the singular minds of housecats. In this hilarious book of tongue-in-cheek poetry, the author of the internationally syndicated comic strip Sally Forth helps cats unlock their creative potential and explain their odd behavior to ignorant humans. With titles like "Who Is That on Your Lap?," "This Is My Chair," "Kneel Before Me," "Nudge," and "Some of My Best Friends Are Dogs," the poems collected in I Could Pee on This perfectly capture the inner workings of the cat psyche. With photos of the cat authors throughout, this whimsical volume reveals kitties at their wackiest, and most exasperating (but always lovable).

A comprehensive and current account of the theory and practical design techniques employed in the production of modern driver units and complete systems. The third edition contains new material on digital program standard, laser analysis of diaphragms, the investigation of stored energy in enclosures and driver developments, audibility of defects in components, and crossover saturation during dynamic transients. The sections on active crossover systems and electroacoustic theory have been revised and expanded.
