Research in most scientific disciplines calls for painstaking accuracy and a hesitation to generalize for fear of distorting the truth. Given this penchant for nuance, scientists often feel uneasy about a relationship with anyone in the media who is seeking an eye-catching lead, usually with limited space to express subtleties. Researchers who give interviews often feel that their findings are distorted or sensationalized, and shun future media contact. By avoiding potential misrepresentations, however, scientists also sacrifice opportunities to educate the public on important issues related to health, the environment, outer space, and much more. In A Scientist's Guide to Talking with the Media, Richard Hayes and Daniel Grossman draw on their expertise in public relations and journalism to empower researchers in a variety of fields to spread their message on their own terms. The authors provide tips on how to translate abstract concepts into concrete metaphors, craft soundbites, and prepare for interviews. For those looking for a higher profile, the authors explain how to become a reporter's trusted source-the first card in the Rolodex-on controversial issues. A must-read for all scientists, this book shows how it is possible for the discoveries that hibernate in lecture halls and academic journals to reach a broader audience in a way that is accurate and effective.

Offers advice for people who might feel a bit awkward about Christian prayer, or might not even know how to go about it, emphasizing the simplicity of the act of talking with God.

Fact: Prayer changes lives. Fact: Superman couldn't. Batman didn't. Wonder Woman wouldn't. Fact: You can. Your super-power is talking with God. Fact: You don't need a degree in theology - anyone can pray. In this book we discover there are three simple elements to prayer, how to use them to effectively change our communication both with God and with other people - and in doing so how these transform our minds from looking at the ordinary to achieving a spiritual understanding of how God looks at things. When we pray we are talking with God, not metaphorically or figuratively or symbolically - but literally and in reality. This book is a journey that explains in everyday language and examples just what prayer is and how we can find our own relationship with God; prayer is His gift to allow us to change our lives and the lives of those around us. Are you ready? ...God is.
