the-century Vienna, and hear an imaginary but illuminating debate with Freud about what helps people to make changes and recover their psychological health. You may be surprised to learn that the answers to many psychological struggles can still be found in Freud's original ideas, as well as in modern findings from psychology, child development, and memory research. Part case study, part fiction, this book is a readable, entertaining introduction to some of the most important ideas—old and new—in the field of psychotherapy. It will change the way you think about the nature of emotions, the root of emotional suffering, and the effectiveness of modern “talk therapy.”

It covers the key areas that students are expected to be confident in, outlining the basics in clear jargon-free English, and then providing added-value features like summaries of key books, and even lists of questions you might be asked in your seminar or exam. The book uses a structure that mirrors many university courses on Freud and psychoanalysis - explaining and contextualising the development over time of Freud's theories. Many of these have passed into mainstream society, including the unconscious, repression, the talking cure, free association, transference, the Oedipus Complex, Narcissism and psychosomatics. An extraordinary collection of thematically linked essays, including THE UNCANNY, SCREEN MEMORIES and FAMILY ROMANCES. Leonardo da Vinci fascinated Freud primarily because he was keen to know why his personality was so incomprehensible to his contemporaries. In this probing biographical essay he deconstructs both da Vinci's character and the nature of his genius. As ever, many of his exploratory avenues lead to the subject's sexuality - why did da Vinci depict the naked human body the way he did? What of his tendency to surround himself with handsome young boys that he took on as his pupils? Intriguing, thought-provoking and often contentious, this volume contains some of Freud's best writing.
