Based on a best-selling book written for physicians that's published annually and which sells over 25,000 copies a year, this text is written in straightforward, plain English that's just right for the intelligent health care consumer who wants current information from the leading edge of medicine. You get over 200 common health problems, each with its own two-page outline that makes the facts easy to find. For each entry you get information on diagnosis, options for treatment, recommended medications, follow-up suggestions, and much more. You'll communicate more effectively with your doctor and help make better choices for your family's health with the information in The 5 Minute Health Advisor.

250 common child health conditions, how to diagnose a condition, treatment options, recommended medications, means of follow-up, and standard insurance billing codes.

The 5-Minute Pediatric Patient Advisor offers busy clinicians much-needed assistance in counselling parents about their children's illnesses and treatments. The book contains concise, complete patient information sheets about more than 150 symptoms and diseases, based on the expert advice in The 5-Minute Pediatric Consult, Second Edition and written in easily understandable layperson's terms. These information sheets can be photocopied and used as "handouts" to answer most of the questions that parents are likely to have. The 5-Minute Pediatric Patient Advisor and The 5-Minute Pediatric Consult, Second Edition can be purchased together as a money-saving package.

'There are important books that focus a full effort on a painful emotion such as depression or panic. Frankly, many troubled people do not directly present with such complaints. Instead, they speak about marital stress, upset about making an oral presentation, dealing with a mean-spirited co-worker, poor nutritional habits, handling uncooperative children or early adolescents, and domestic violence. They want practical guidance about those content areas as well.'- John F Clabby. Health professionals confronted with symptoms of mental and emotional distress often lack knowledge of how to respond to the situations that underlie them, or feel unable to address them in time-limited consultations. This can lead many to either adopt an empathetic listening approach which fails to address underlying causes effectively, or avoid asking their patients and clients about their psychosocial lives at all. *Two Minute Talks to Improve Psychological and Behavioral Health* takes a unique approach to this common dilemma. It provides concise, pragmatic and matter-of-fact advice which health professionals can use to effectively address the most common underlying causes of distress, such as work, family or relationship difficulties, poor nutritional habits, domestic violence and grief. Although firmly evidence-based, it avoids unnecessary detail to provide a practical reference which can either be read in its entirety or used as a quick reference of clear, accessible advice and strategies that patients can put into use. It is an essential addition to the

toolbox of all health professionals who want to provide effective, responsive and empathetic care to their clients in time-limited situations. 'This book will reveal to you talents and results you did not believe possible. It will re-energize your approach to care, and make it fun to talk with and get to know your patients'. - from the Foreword by Kenneth Faistl.

IBM® System Storage® Gen 5 fabric backbones are among the industry's most powerful Fibre Channel switching infrastructure offerings. They provide reliable, scalable, and high-performance foundations for mission-critical storage. These fabric backbones also deliver enterprise connectivity options to add support for IBM FICON® connectivity, offering a high-performing and reliable FICON infrastructure with fast and scalable IBM System z® servers. Designed to increase business agility while providing nonstop access to information and reducing infrastructure and administrative costs, Gen 5 Fibre Channel fabric backbones deliver a new level of scalability and advanced capabilities to this robust, reliable, and high-performance technology. Although every network type has unique management requirements, most organizations face similar challenges managing their network environments. These challenges can include minimizing network downtime, reducing

## Read Online The Five Minute Health Advisor

operational expenses, managing application service level agreements (SLAs), and providing robust security. Until now, no single tool could address these needs across different network types. To address this issue, the IBM Network Advisor management tool provides comprehensive management for data, storage, and converged networks. This single application can deliver end-to-end visibility and insight across different network types by integrating with Fabric Vision technology; it supports Fibre Channel SANs, including Gen 5 Fibre Channel platforms, IBM FICON, and IBM b-type SAN FCoE networks. In addition, this tool supports comprehensive lifecycle management capabilities across different networks through a simple, seamless user experience. This IBM Redbooks® publication introduces the concepts, architecture, and basic implementation of Gen 5 and IBM Network Advisor. It is aimed at system administrators, and pre- and post-sales support staff.
