Biological techniques, called the 'biologics', differ from the usual chemical medications. Their optimum use, and the detection and management of adverse events, pose a significant challenge to the clinician. Licences for new biologics continue to be granted for the likes of rituximab, abatacept and certocizumals pegol. Intensive research is also defining new areas in which these drugs will be used in the future, increasing the number of practitioners using biologics. As the use of these drugs increases around the world, so the level of information needed by primary care practitioners and specialist prescribers needs to be expanded. The Handbook of Biological Therapy provides the practising clinician with a practical guide to the use of Tumour Necrosis Factor
