inequality and levels of political participation is compounded by high youth unemployment or precarious employment in many countries, it is not surprising that new social media communications may be seen as a means to re-engage young citizens. This edited collection explores the influence of social media, such as YouTube, Facebook, and Twitter, upon the participatory culture of young citizens. This collection, comprising contributions from a number of leading international scholars in this field, examines such themes as the possible effects of social media use upon patterns of

learning across primary and secondary schools in the UK, an in-depth case study of uses and outcomes in a school in Singapore, an analysis of learning outcomes arising across primary, special and secondary schools in one local authority in the UK, and a look at student preferences for using a learning platform in a school in Taiwan. The volume sheds important light on the subject, but with the ever changing development and introduction of learning platforms, much remains to be explored. Indeed, it is likely that learning platforms will evolve further with affordances and integrated features

being added over the next five and more years. This work hints at future practices and their potential outcomes, pointing to the need for greater detail being gathered through future research studies, in order to understand ways teachers and learners might most effectively benefit from more holistic or 'blended' approaches across the applications provided. This book will not only be of particular interest to those involved in using learning platforms, but also to those advising on, and developing, learning platforms. Key lessons and issues are of relevance to policy makers, school
