Examines the terrorist attacks of September 11th and why the disaster was not prevented, discussing how breakdowns in intelligence and political infighting allowed terrorists to carry out an unprecedented attack on American soil.

On September 11, 2001, a small number of desperate men hoping to earn paradise attacked New York and Washington, D.C. Their spectacular acts of destruction concluded America's nearly decade-long vacation from insecurity, known as the "post-Cold War era." As eras go, this one was short and it

certainly ended with a bang, not a whimper. The United States, still sole superpower, was now challenged by a bleak new world. Americans do not care for the bleak and do not tolerate it for long. Predictably, national shock soon became righteous anger, coupled to international campaigns against groups and states held responsible for the scourge of terrorism. These were short-term measures that hurt our enemies but did not "fix" the problem. Not long after these events, the Foreign Policy Research Institute organized a new Center on Terrorism, Counterterrorism, and Homeland Security. Its purpose was to take a longer term view of the terrorism problem and what might be done about it--not only academic research but also policy suggestions. This book contains a broad selection of the Center's output, including essays on American strategy, homeland security, knowing the enemy, and the military dimension. A notable feature is the discussion of the educational issue: what and how to teach our children about terrorism.

In *What Really Happened*, Kevin Groenhagen presents the facts concerning Bill Clinton's actual record on Iraq and terrorism. It's a record that is far different from what Clinton Inc, and their allies in the media have been telling the American people during the past eight years. The facts Clinton Inc. has attempted to rewrite include, but are not limited to, the following: * The Clinton administration in 1998 claimed that al Qaeda reached an understanding with the government of Iraq that al Qaeda would not work against that government and that on particular projects, specifically including weapons development, al Qaeda would work cooperatively with the Government of Iraq. * Secretary of Defense William Cohen in July 2000 said protecting the American people from the threat posed by axis of evil (Iran, Iraq, and North Korea) was the most important issue to address. * Bill Clinton's policies vis-a-vis Iraq ultimately led to 9/11 and other messages with no words.

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States—which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean—it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts—it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7—it is nevertheless an essential record of one of the most transformational events of modern times.

In *See No Evil*, one of the CIA's top field officers of the past quarter century recounts his career running agents in the back alleys of the Middle East. In the process, Robert Baer paints a chilling picture of how terrorism works on the inside and provides compelling evidence about how Washington politics sabotaged the CIA's efforts to root out the world's deadliest terrorists. On the morning of September 11, 2001, the world witnessed the terrible result of that intelligence failure with the attack on the World Trade Center and the Pentagon. In the wake of those attacks, Americans were left wondering how such

an obviously long-term, globally coordinated plot could have escaped detection by the CIA and taken the nation by surprise. Robert Baer was not surprised. A twenty-one-year veteran of the CIA's Directorate of Operations who had left the agency in 1997, Baer observed firsthand how an increasingly bureaucratic CIA lost its way in the post-cold war world and refused to adequately acknowledge and neutralize the growing threat of Islamic fundamentalist terror in the Middle East and elsewhere. A throwback to the days when CIA operatives got results by getting their hands dirty and running covert operations, Baer spent his career chasing down leads on suspected terrorists in the world's most volatile hot spots. As he and his agents risked their lives gathering intelligence, he watched as the CIA reduced drastically its operations overseas, failed to put in place people who knew local languages and customs, and rewarded workers who knew how to play the political games of the agency's suburban Washington headquarters but not how to recruit agents on the ground. See *No Evil* is not only a candid memoir of the education and disillusionment of an intelligence operative but also an unprecedented look at the roots of modern terrorism. Baer reveals some of the disturbing details he uncovered in his work, including: * In 1996, Osama bin Laden established a strategic alliance with Iran to coordinate terrorist attacks against the United States. * In 1995, the National Security Council intentionally aborted a military coup d'état against Saddam Hussein, forgoing the last opportunity to get rid of him. * In 1991, the CIA intentionally shut down its operations in Afghanistan and Saudi Arabia, and ignored fundamentalists operating there. When Baer left the agency in 1997 he received the Career Intelligence Medal, with a citation that says, "He repeatedly put himself in personal danger, working the hardest targets, in service to his country." See *No Evil* is Baer's frank assessment of an agency that forgot that "service to country" must transcend politics and is a forceful plea for the CIA to return to its original mission—the preservation of our national sovereignty and the American way of life.

This fascinating book analyzes 13 control failures in human history, from Robespierre's promotion of the French Revolution, to Hoover's efforts to stop the Great Depression, to the intelligence failures of 9/11. Assessing the causes of 10 additional historical cases, the author's comparative analysis shows how each leadership failure was caused by an expansion of the range of control attempts, their scope, and/or their diversity. A leader's or other actor's attempts to broaden the range of control targets have been most important in causing great human failures. The analysis is timely during an era when war, global warming, and other vexing problems plague our society.

This study evaluates whether surprise and intelligence failure leading to mass casualty terrorism are inevitable. It explores the extent to which four factors — failures of public policy leadership, analytical challenges, organizational obstacles, and the inherent problems of warning information — contribute to intelligence failure. The study applies existing theories of surprise and intelligence failure to case studies of five mass casualty terrorism incidents: World Trade Center 1993; Oklahoma City 1995; Khobar Towers 1996; East African Embassies 1998; and September 11, 2001.

This ground-breaking book examines how and why the much-vaunted Oslo Peace Accords between the Israelis and Palestinians collapsed. The author analyzes the players on both sides of the accords, pointing out the attitudes and actions that serve to undermine peace and promote conflict. On the one hand, she criticizes the Islamist organizations Hamas and Palestinian Islamic Jihad for not tolerating the idea of any true long-term peace with Israel. On the other hand, she scrutinizes the factions for and against Oslo that developed within Israeli government circles, and she calls into question the ability of Israeli

intelligence to correctly assess the Palestinian negotiators. By means of such examination, this book poses a fundamental question: Can Islamic fundamentalism ever accept the existence of Israel or will it short-circuit any prospect of peace between majority-Muslim states and their non-Muslim counterparts?
