Policy analysts love solving complex problems. Their favorite problems are not just technically complex but also characterized by the presence of many different social actors that hold conflicting interests, objectives, and perceptions and act strategically to get the best out of a problem situation. This book offers guidance for policy analysts who want to assess if and how their analysis could be of help, based on the premise that problem formulation is the cornerstone in addressing complex problems. This book positions policy analysis within the theories on processes of policy making, and focuses on methods and techniques for structuring complex problems. The book takes a systems perspective as its basis, complemented by techniques for analyzing multi-actor systems, and for dealing with an uncertain future. Analytical results are then interpreted and used for problem formulation. In the last part of the book, the resulting problem formulation is used to diagnose meaningful follow-up activities, including potential in-depth policy analysis research. This book is firmly embedded in problem structuring theory, but also shows the tricks of the trade, the assumptions underlying practice, the choices that need to be made, and the dilemmas encountered by the analyst. The authors are involved in teaching problem structuring methods and policy analysis at the Faculty of Technology, Policy and Management of Delft University of Technology. Their interdisciplinary approach to problem formulation reflects their multi-disciplinary backgrounds, which range from physics, informatics and land-use planning to public administration and the philosophy of technology. This collection explores the practical operation of the law in the area of litigation costs and funding, and confronts the issue of how exposure to cost risks affects litigation strategy. It looks at the interaction of the relevant legal regime, regulatory framework and disciplinary rules with the behaviour of litigants, courts and legislatures, examining subjects such as cost rules and funding arrangements. The book discusses a wide range of topics such as cost-shifting rules, funding and mass tort litigation, cost rules and third-party funding (TPF) rules in specific areas such as intellectual property (IP) litigation, commercial arbitration, investment arbitration, the role of legal expense insurance arrangements, fee regulation and professional ethics. The contributors include renowned scholars, experts in their respective fields and well-versed individuals in both civil procedure and the practice of litigation, arbitration and finance. Together, they present a broad approach to the issues of costs, cost-shifting rules and third-party funding. This volume adds to the existent literature in combining topics in law and practice and presents an analysis of the most recent developments in this fast developing area.

"The book's chapters provide background on how and why the CIPP (Context, Input, Process, Product) Model was developed; a detailed presentation of the model; an explanation of the key role of an evaluation-oriented leader, who can decide what and when to evaluate; detailed presentations on evaluation design, budgeting, and contracting; procedures and tools for collecting, analyzing, and reporting evaluation information; and procedures for conducting standards-based meta-evaluations (evaluations of evaluations). These topics are interspersed with illustrative evaluation cases in such areas as education, housing, and military personnel evaluation"--

Are you relentlessly curious and creative, always willing to rock the boat in order to get things done . . . extremely energetic and focused, yet constantly switching gears . . . intensely sensitive, able to intuit subtly charged situations and decipher others' feelings? If these traits sound familiar, then you may be an Everyday Genius—an ordinary person of unusual vision who breaks the mold and isn't afraid to push progress forward. . . . As thought-provoking as Daniel Goleman's Emotional Intelligence, psychologist Mary-Etaine Jacobsen's Gifted Adults draws on a wide range of groundbreaking research and her own clinical experience to show America's twenty million gifted adults how to identify and free their extraordinary potential. Gifted Adults presents the first practical tool for rating your Evolutionary Intelligence Quotient through an in-depth personality-type profile. Demystifying what it means to be a gifted adult, this book offers practical guidance for eliminating self-sabotage and underachievement, helping Everyday Geniuses and those who know, love, and work with them to understand and support the exceptional gifts inherent in these unique personality traits.

The traditional understandings that structure the relationships between public servants and the wider political system are said to have undergone considerable change. But what are these formalized and implicit understandings? What are the key dimensions of such bargains? In what conditions do bargains rise and fall? And has there been a universal and uniform change in these bargains?The Politics of Public Service Bargains develops a distinct perspective to answer these questions. It develops a unique analytical perspective to account for diverse bargains within systems of executive government. Drawing on comparative experiences from different state traditions, this study examines ideas and contemporary developments along three key dimensions of any Public Service Bargain - reward, competency and loyalty and responsibility.The Politics of Public Service Bargains points to diverse and differentiated developments across national systems of executive government and suggests how different 'bargains' are prone to cheating by their constituent parties. This study explores the context in which managerial bargains - widely seen to be at the heart of contemporary administrative reform movements - are likely to catch on and considers how cheating is likely to destabilize such bargains.

Data is the foundation of the digital economy. Industry 4.0 and digital services are producing so far unknown quantities of data and make new business models possible. Under these circumstances, data quality has become the critical factor for success. This book presents a holistic approach for data quality management and presents ten case studies about this issue. It is intended for practitioners dealing with data quality management and data governance as well as for scientists. The book was written at the Competence Center Corporate Data Quality (CC CDQ) in close cooperation between researchers from the University of St. Gallen and Fraunhofer IML as well as many representatives from more than 20 major corporations. Chapter 1 introduces the role of data in the digitization of business and society and describes the most important business drivers for data quality. It presents the Framework for Corporate Data Quality Management and introduces essential terms and concepts. Chapter 2 presents practical, successful examples of the management of the quality of master data based on ten case studies that were conducted by the CC CDQ. The case studies cover every aspect of the Framework for Corporate Data Quality Management. Chapter 3 describes selected tools for master data quality management. The three tools have been distinguished through their broad applicability (method for DQM strategy development and DQM maturity assessment) and their high level of innovation (Corporate Data League). Chapter 4 summarizes the essential factors for the successful management of the master data quality and provides a checklist of immediate measures that should be addressed immediately after the start of a data quality management project. This guarantees a quick start into the topic and provides initial recommendations for actions to be taken by project and line managers.
